

ENTRON™

PROG SEL SW 0-15 CASED Part # 90-80-28

External weld program schedule select switch can be used in conjunction with all ENTRON Controls when quick and simple weld program schedule selection is required.

This switch can be used to select up-to 16 weld program schedules and change programs on the fly in Seam configuration.

The switch is supplied with 10 feet / 3 meters of cable to allow for operator ergonomic location.
