

Controls for Resistance Welding EN1280

Flash/Anneal Welding Controls

Features

- 50 Unique Weld Schedules
- Standard with 150 and 300A Air Cooled Contactors
- Error Code Display
- Compact, Lightweight Air Cooled Cabinet
- Flash Weld Sequence Initiation
- Individual Upset Time and Upset Percent Current
- Anneal Initiation Input
- Power and Weld Indication Lamps
- Single Phase Operation

- Dynamic Automatic Power Factor Equalization
- External Emergency Stop Inputs
- Manual Current Adjustment
- Optional Program Lockout Switch

Capabilities

- Easy to Install and Operate
- Program Only Necessary Parameters
- Unique Annealing Sequence

- *New Design Reduces Cost* Simplified design significantly reduces production costs which are passed on to you.
- Replaces ENA150 & ENA300

Provides the same functionality as the ENA150 and ENA300 controls.

- Designed Specifically for Flash/Annealing Applications
- *Simple to Program* Push buttons and a three-step procedure make easy work of programming any welding schedule.
- Direct Reading Digital Data Display

• Two Year Warranty

A two year warranty is offered on all ENTRON parts and assemblies. Expert phone support and application service are available at no cost.

Exclusive ENTRON two year warranty

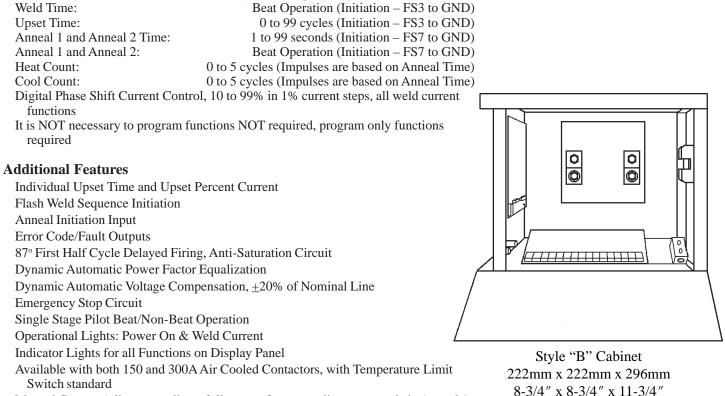

EN1280 Series Controls

Flash/Anneal • Multiple Schedule/Multiple Sequence Controls

Supercedes: February 2007 Date: April 2014

SPECIFICATIONS

Absolute Count: Push Button Data Entry with Display

Manual Current Adjustment allows full range of current adjustment made in Anneal 1 and Anneal 2 or during weld time

8-3/4" x 8-3/4" x 11-3/4"

The EN1280 Series Control is a microprocessor based resistance welding control. This control has been designed specifically for Flash Welding, Upset Welding, and Anneal applications. The EN1280 can store weld sequence parameters in each of 50 unique schedules. Weld schedule parameters are held in non-volatile memory for storage. The EN1280 control is simple to program and operate.

• Store up to 50 UNIQUE SCHEDULES

Every parameter of each schedule individually accessible Each schedule can store 11 distinct and totally different parameters All schedules retained in memory with power off It is NOT NECESSARY to program functions not required

- Single contactor circuitry; Process control outputs
- Additional Standard Features:
 - **Contactor Failed Detection**
 - Power & Weld Indication Lamps
- Control can be INTERFACED with external Programmable Logic Control (PLC); Advanced interfaces available
- Meets or exceeds RWMA/NEMA standards
