

ENTRON™

Controls for Resistance Welding

DATAPAK 700

Machine-mounted Weld Monitor

Features

- Counts up to 9999 welds or components
- Multipoint calibration for accuracy
- RS232 communications for printing and PC download
- Analog output of current level
- 64 selectable monitoring programs
- Vacuum-fluorescent display and illuminated buttons
- Built-in Counter checks for correct number of spots on a component
- Measures AC, DC, and MFDC
- Measures Capacitor Discharge currents, time and force
- Teach facility allows for easy set-up
- Flexible Toroids – 3", 6", and 12"

Can be used as a general-purpose weld meter or as a machine process monitor. Supplements legacy installations or replaces existing meters by measuring current, time and force and having the capability to interface with individual welding stations.

Exclusive ENTRON one year warranty
