1 Introduction

1.1 Scope

The EN6001 product has various hardware versions. The firmware version uploaded to the control must be compatible with the hardware version. This document outlines the steps to identify the Hardware version of the EN6001 and update the firmware via the USB port.

1.2 Firmware and Hardware information

To check your Firmware and Hardware information, navigate the Main Menu to find the About button shown in **Figure 1**.

Figure 1: Main Menu

In the About Menu the Firmware and Hardware information will be displayed as shown in **Figure 2: About Menu**

Figure 2: About Menu

2 Updating Firmware

To update the EN6001 Firmware follow the steps in [Table 1](#).

NOTICE

Notice

Only perform this update if you have Firmware Version: 10.00 and Hardware Version: 3.00

Step	Description	Screen / Parameters	Key Inputs
